Our Mission

The main goals of our two companies is to be environmentally responsible by offering sustainable apparel to our clientele and printing them in the cleanest, most toxic-free way.

It is important to us that we do three things with each transaction: offer our customer great products and services, at a fair and competitive price, delivered on time and in the manner in which the client envisioned their job would look like.

Ultimately, this does not change from time to time or situation to situation, but is the core value of our company and transcends any growth rate or profits.

Our Story

Although our company began in 1983, the decision to become more environmentally responsible (or “green” as it is now called) in 1997. My son decided to come to work for our company and make it his career. I knew my business was toxic type of industry and I thought to myself, it’s one thing to poison myself, but to poison my own child would be unthinkable. Our company immediately began its CHANGE then and there!

Re-Tooling Our Business CHANGE

**machinery
supplies
vendors
customers
attitude**

now how do we let the world know?

Organic Apparel

The Future

Green should not be simply a trend, and sustainability means exactly what it means. Our environment and the way we do business will mean more to us in the long run than the war, the housing market or the economy. We have a dream, and to have a future we will have to stay true to our vision.
